

HEMAN RAJ L

1. 5-Year Plan:

"I am currently pursuing my MSC and learning skills like Java, MySQL, HTML, and CSS. I have worked on projects such as Tourism Travel and Flower Detection. I particularly enjoy frontend development and love creating clean, user-friendly interfaces.

While I have some interest in full-stack development, my primary focus is on becoming strong in frontend first. Over the next five years, I aim to become a skilled frontend developer capable of building attractive and user-focused websites and applications. I also plan to learn backend basics to better support my frontend work when needed.

I believe this internship will give me the right experience to sharpen my frontend skills and begin my professional journey."

2. Why Me:

"I have hands-on experience from projects like Tourist Travel and Flower Detection, where I worked with Java, MySQL, HTML, and CSS. Through these projects, I discovered my passion for frontend development, especially designing clean and simple user interfaces.

Although I am still learning full-stack development, my main interest lies in frontend. I am hardworking, eager to learn, and truly passionate about improving my skills.

I believe my dedication and love for frontend development will allow me to make a positive contribution to the team during this internship.
